| <ul> <li>Average rated life</li> </ul>    | 300hr           |
| •Base                                     | 25x51 Cyl 165mm |
|                                           |                 |

## **Lamp Operation**

Burn Position H15
Maximum Seal Temperature 350° C
Cooling Forced Cooling/Fan
Lamp can be used on electronic or AC magnetic
Ballast/igniters

## **Application Information**

- Do not exceed rated wattage or voltage
- Replace lamp at or before rated life
- Do not exceed rated seal temperature
- Use only with properly rated fixtures and ballasts

GE Consumer & Industrial Specialty Lighting is constantly developing and improving its products. For this reason, all product descriptions in this brochure or intended so a general guide and the wing change specialisations time to time in the interest of product development, without prior notification or public announcement. All descriptions in this publication present only general particulars of the goods to which they refer and shall not form part of any contract. Data in this guide has been obtained in controlled experimental conditions. However, GE Lighting cannot accept any liability arising from the relatione on such data to the extent permitted by low.
