

LED LENSER®   
CREATING NEW WORLDS OF LIGHT

---

● From architecture to electronics, Germany is known for advanced design and precise engineering. LED LENSER flashlights and headlamps are no exception. Embedded in our intuitive torches is patented technology enhancing your experience with clearer, brighter, focusable light. We've pushed the boundaries of lighting technology and design for two decades from our headquarters in Solingen, Germany, and are proud to share our latest, ground-breaking creations with you. Join us in creating new worlds of light.

# **WELCOME TO A NEW GENERATION OF LIGHTING.**

**More performance. More power. More technology.  
Introducing the new industry standard from  
LED LENSER.**

# NEW TECHNOLOGY.

We've taken product design, technology and manufacturing to a new level.

- 
- Behind our award-winning design is advanced yet practical technology that not only yields incredible quality - it also gives users an unprecedented level of simple control over the output of their light. LED LENSER torches are produced using the newest LED technology, integrated cooling, easy-to-use switching and ergonomic designs at our own state-of-the-art production facility.

- Our patented modular design improves system reliability by reducing the number of points of contact within the torch. It also means simpler repairs under our **five year warranty** in the case that something does go wrong. It also means fewer replaced parts making their way into landfills. That's not only smart - it's good for the environment.

Battery Cartridge  
Easy to exchange.

Smart Light Technology™

Water-resistant Tail Cap

Hard Gold-plated Contacts

Corrosion-resistant Thread

# MODULAR DESIGN.

# SEO SERIES.

**The next generation of high-performance headlamps, SEO is ready for any adventure. All SEO headlamps feature up-front battery and control configurations, light weight, red and white LEDs, simple and versatile angle adjustment, and industry-beating specifications.**

## SEO 3

FL1 STANDARD	BOOST	POWER	LOW POWER
90 LUMENS	90 LUMENS	80 LUMENS	15 LUMENS
40 METRES	40 METRES	30 METRES	18 METRES
10 HOURS	10 HOURS	14 HOURS	40 HOURS
	IPX6		
	96g (inc. Batteries)		

- Finally, a lightweight headlamp that doesn't compromise on functionality. The LED LENSER SEO 3 features Smart Light Technology™ for switching quickly between high and low power and a signal mode, and boasts 3 white LEDs, 1 red LED, and a helpful carabiner clip for carrying on the go. At only 96 grams, this might be the most versatile headlamp you'll own.

## SEO 5

FL1 STANDARD	BOOST	POWER	LOW POWER
180 LUMENS	180 LUMENS	160 LUMENS	20 LUMENS
120 METRES	120 METRES	100 METRES	20 METRES
7 HOURS	7 HOURS	12 HOURS	25 HOURS
	IPX6		
	105g (inc. Batteries)		

- Power and versatility in one package! The LED LENSER SEO 5 shines bright with 180 lumens on high, features a red LED for preserving night vision, and utilises a high end power white LED with flash function and a swiveling head ensures you'll have light where you want it, when you want it. The Advanced Focus System™ allows for a close up spot or a wider beam, making the SEO 5 a flexible, lightweight, and technology centered headlamp for any sport, hobby or job. Available in Red or Grey.

- Now, get the technology and features you want in a compact, lightweight and rechargeable design. Featuring our German-engineered OPTISENSE Technology™, the SEO 7R will sense the light level in your surrounding area and adjust its brightness automatically to save battery life and give you light when you need it, without taking your hands from your task. A red LED preserves your night vision and helps make sure you stay safe while enjoying the activities you love. Get it all with the SEO 7R.

# RECHARGING THE FUTURE.

More and more people are looking for easy ways to incorporate technology and sustainability into their lives; to make a difference now and for the future generations. With LED LENSER lighting these two things go hand-in-hand with our rechargeable battery technology.

Every year millions of batteries find their way into landfills around the world. Today it's not just possible, but also easy and fast, to offset the environmental and financial cost of traditional batteries with rechargeable ones. With the introduction of the LED LENSER Floating Charge System and Safety Ytrion Cell™ batteries, rechargeable technology has just taken a monumental leap forward.

# THE FUTURE IS NOW.

● The wait is over for a rechargeable battery that takes safety, power and run time to a whole new level. Introducing the Safety Ytrion Cell™ battery from LED LENSER; the first flashlight battery to truly mimic the properties of the hybrid car battery—non-explosive, long run times and the ability to recharge thousands of times without losing significant battery capacity. And while some of this may sound familiar, the actual findings are anything but typical. The Safety Ytrion Cell™ battery can:

- **BE CHARGED 3000+ TIMES**
- **MAINTAINS 90% ORIGINAL CAPACITY AFTER 2000 CHARGES**
- **CHARGE TWO OR THREE-TIMES FASTER THAN TRADITIONAL NIMH OR LITHIUM BATTERIES**
- **PROVIDE HUGE SIZE-TO-ENERGY-CAPACITY RATIO REDUCTIONS**
